

Announcement

Feb. 05, 2020

Northville & Jackson, Michigan

Los Angeles, California

Contact: Julius J. Rim, Ph.D, President IMET, Ltd.

Inventor of the GreenPower™ Muffler system,

e- dieseltrap@gmail.com cell:248-765-7747

Like Tesla Electric-truck, Rim's Invention retrofit system can increase fuel-economy for all vehicles in the USA and reduce GreenHouseGas emission now.

After Elon Musk saying that Tesla's Electric Semi can actually reduce 50% of fuel (electricity) cost compared to new diesel-semi, Tesla's stock price jumped 321% yesterday

Today, it is announced that IMET's stocks are offered privately to raise capital to manufacture and distribute IMET GreenPower™ Muffler system for the USA immediately.

<https://www.youtube.com/watch?v=hNGa9wWnxMI>

IMET's GreenPower™ Muffler system appears to be the world's first engine-muffler waste-heat recovery device into which water is added to increase fuel-economy and power. It can save more fuel than the German car OEM, BMW and Bosch's water-injection system.

<http://www.businesswire.com/news/home/20160831005985/en/Water-gasoline-Bosch-water-injection-innovation-reduces>

President Obama's GreenHouseGas(GHG) emission rule mandated an increase in fuel-economy by 16-25% for all new (OEM) trucks in the USA. The benefits are huge: \$170 Billion fuel saving and reduction of 1 Billion Tons of GHG or CO2 by 2027 for the USA.

Rev. Jim Antal, the author of the book "Climate Church; Climate World" argues that climate change is the greatest moral challenge humanity has ever faced. The people of the faith must act now for Climate Change Crisis.

Therefore, Inventor J. Rim is now commercializing the GreenPower™ Muffler system for the USA with benefits to partners and accredited investors.
